17263-62624:JVD:1081819

IN THE SPECIFICATION

Please amend the second paragraph on page 13 as follows:

FIGS. 16 and 17 depict an apparatus 1030 according to another embodiment of the

present invention. Apparatus 1030 includes a stand up pouch container 1032 preferably

fabricated from flexible or semi-rigid material. Container 1032 can contain any type of contents.

including for example, a drink, candy, potting sol, or other pourable material. Container 1032

includes a mouth 1034 which is generally opposite of a bottom 1035a. In some embodiments,

container 1032 includes a bottom 1035a adapted and configured to permit container 1032 to

stand. A pair of sidewalls 1035b and 1035c extend from mouth 1034 to the bottom 1035a.

Preferably, container 1032 includes at least one side 1036 having I-a-I an unbroken folding side

gusset.

Please amend the first full paragraph on page 15 as follows:

A preferred embodiment of the invention is shown in FIG. 19. The container 1055 of

FIG. 19 is identical to the embodiment of FIGS. 16 and 17 except for the fact that the upper edge

1050 of the [-folding-side-gusset-] unbroken folding side gusset extends upwardly a greater

extent than the folding side gusset 1036 of FIG. 17. Thus in some embodiments of the invention

the material of which the container is made may be a single sheet of plastic in which the upper

edge of the sheet is straight across including the upper edge 1050 of the gusset and the portion of

the sheet attached to the interlockable profiles 1045a and 1045b.

RESPONSE TO FINAL OFFICE ACTION
